To achieve SDGs: Creativity becomes most essential

Geoff Mulgan, NESTA, UK

A paradigm shift in education is needed

What we have for the past - to train A model students

Focus on knowledge and Skills

Confined mostly to one
lab/department

One curriculum for all

Individual based competition mode

Limited by local vision and culture

Rarely connected about the real
world

What we need for the future - to cultivate X model students

Focus on creativity and innovation

Highly interdisciplinary training

Personalized & diverse training
program

Team based cooperation mode

International vision and engagement

Innovate in and for the real world

Open FIESTA: a pilot program for future education

Inauguration of Open FIESTA, 2015
Graduate School at Shenzhen, Tsinghua University

Open FIESTA is a pilot program in Tsinghua University to explore and develop novel models, methods and technologies to nurture future-oriented interdisciplinary innovators and change makers.

Challenge is the best invitation for innovation.

Education with SDGs at University-City level

Design for social innovation

2016: Design for Future Education

2017: Design for Sustainable Society

2018: Design for children-friendly city

MISSION

To enhance technology development by creating a platform for innovation, rapid prototyping, and adaptation of effective technology based on local resource.

OBEJECTIVE

- Empowering the youth of Ethiopia to design and manufacture electronic goods in Ethiopia
- Introducing products of innovative electronic gadgets designed and made in Ethiopia that can be sold in the local market
- Introducing the concept of rapid prototyping
- Creating expedience market environment for innovative technology
- Getting experience for technology creation and development
- Enhancing the skill of entrepreneurs in innovation area
- Adopting the Shenzhen Open Innovation Model to the existing Ethiopian Economy and Industrialization progress

VISION

In general, the country's vision is "to see Ethiopia become a country where a democratic rule, good governance, and social justice reigns upon the involvement and free-will of its peoples, and once extricating itself from poverty and transform to a middle-income economy as of 2020-2023."

In particular, this project's vision is: To make Ethiopia a regional Innovation Center on science and technology in East Africa by 2020.

HPreto-Kit

Prototyping Kit for Humanitarian

Problem 问题

- The world is going digital. Digital humanitarianism (Digital-Humanitarianism) is becoming an important trend in the humanitarian field.
- Humanitarian organizations need to be able to use digital tools to improve their humanitarian response.
- Humanitarian organizations need to be able to use digital tools to improve their humanitarian response.

- Humanitarian organizations need to be able to use digital tools to improve their humanitarian response.
- Humanitarian organizations need to be able to use digital tools to improve their humanitarian response.
- Humanitarian organizations need to be able to use digital tools to improve their humanitarian response.

Solution 解决方案

Our solution is a prototyping kit for humanitarian organizations. It is a kit that allows humanitarian organizations to prototype their humanitarian response. It is a kit that allows humanitarian organizations to prototype their humanitarian response.

Our solution is a prototyping kit for humanitarian organizations. It is a kit that allows humanitarian organizations to prototype their humanitarian response. It is a kit that allows humanitarian organizations to prototype their humanitarian response.
